

## **ENVIRONMENTAL POLICY**

### **POLICY STATEMENT**

As a leading design house, colour printer and finisher, based in the North West that provides its service throughout the UK, Indigo Lithoprint Limited recognises the importance of environmental considerations and wherever practicable will seek to continually improve environmental performance and prevent pollution.

### **PRACTICAL IMPLEMENTATIONS**

Indigo Lithoprint Limited uses a high percentage of recycled products where possible.

We are, at this moment, devising a questionnaire regarding environmental care assurance and are currently investigating forest sources for paper manufacture, with a view to increasing the volume of products from FSC certified forests.

We require from all paper merchants and their sources, copies of environmental policies with ideally, registration to ISO 140001.

We specify that all virgin pulp paper must be at least ECF (elementally chlorine free).

All technical and environmental specifications are filed on all papers we use and updates are automatically sent by the supplier.

Indigo Lithoprint Limited is committed to minimising the adverse impact of its operations on the environment.

In general, Indigo Lithoprint Limited will incorporate the following principles into everyday management practice;

To recognise and respond to customer and public concerns about environmental issues and industry activities.

- To develop and produce products and processes, which can be manufactured, transported, used and disposed of safely thereby minimising the impact on the environment.
- To regulate, monitor and review our manufacturing processes and the product and processes offered to customers to ensure that appropriate technical and environmental improvements are made where practicable.
- To operate our manufacturing plants and facilities in an environmentally responsible manner, to protect the health of our employees and the public.

In particular Indigo Lithoprint Limited will:-

- Meet the requirements of all relevant laws and regulations, as a minimum.
- Reduce wherever possible the level of harmful emissions from operations.
- Permit waste disposal only via licensed contractors.
- Substitute safer materials for hazardous items, wherever practical.
- Design energy efficiency into new buildings.
- Promote environmental issues to its employees.
- Review the environmental issue at senior manager level.

### **RESPONSIBILITY**

Production Director Mr. Anthony Pearce has overall responsibility for ensuring that the environmental policy is implemented. Responsibility for tracking progress of systems and review of this policy document annually is shared between Directors, Mr. Peter Kelly and Mr. Mark Nicholson.
